Research statement

Plants are fascinating. They form complex and plastic networks (both above- and below-ground), ever integrating and adapting to endogenous and exogenous clues. Manipulation of these networks brings the promise to unlock plant productivity in limiting environments. My primary research interests lie in the understanding of these interconnected, multi-scale regulations pathways in crop plants.

The incredible complexity of plants calls for integrative research strategies such as **combining innovative plant phenotyping pipelines with powerful data analysis and modelling tools**. My belief is that combining computational tools with the latest biological knowledge will open new horizons for plant research. Which is why I spend most of my time developing new tools, connecting them to existing ones and making them available for the plant science community.

Current position

2016–now **Assistant Professor**
Forschungszentrum Jülich | University of Louvain

We use and develop computational tools to understand how plants regulate their growth through long distance signals (such as water and carbon flows).

Bibliometrics

Peer-review publications: **30**
Total number of citations: **722**
H-index: **13**
Guest editor: **GigaScience**

Reviews performed: **60**
Invitations to conferences/workshops: **16**
Organisation of conferences/workshops: **3**
Academic editor: **Plant Direct**

Professional experiences

2016–now	**Assistant Professor**	Forschungszentrum Jülich | University of Louvain
2014–2016	**FNRS post-doctoral fellow**	Plant Physiology, PhytoSYSTEMS, ULg
2013–2014	**Post-doctoral fellow**	Plant Physiology, PhytoSYSTEMS, ULg
2008–2012	**PhD student**	Ecophysiology and Plant Breeding, UCL
2010-2012	**President of the ACELI**	Earth and Life Insititue, UCL

Professional experiences

2014–2016 **FNRS post-doctoral fellow** PhytoSYSTEMS, Univeristé de Liège, Belgium
Advisor: Prof. Claire Périlleux
Fellowship: Fonds de la Recherche Scientifique - FNRS

Understand allometric relationships in maize, both at the plant and root system level. The project combines phenotyping, modelling and transcriptomic approaches.

2015–2016 **FNRS post-doctoral fellow** Forschungszentrum Jülich IBG-3, Germany
Advisor: Prof. Andrea Schnepf
Fellowship: Fonds de la Recherche Scientifique - FNRS

Improve an existing plant model and couple it to a soil water movement model in order to explicitly simulate water and carbon fluxes in the plant.

2013–2014 **Post-doctoral fellow** PhytoSYSTEMS, Univeristé de Liège, Belgium
MARS project: www.iap-mars.be
Advisor: Prof. Claire Périlleux
Fellowship: Belgian Science Policy, Inter-university Attraction Pole

Better understand how root and shoot influence each other and how this interaction contributes to the development of the plant.

2008–2012 **PhD student** Earth and Life Institute, UCL, Belgium
Regulation of water flow in the soil-root domain.
Supervisor: Prof. Xavier Draye
Fellowship: FNRS-FRIA + DROPS (EU-FP7)

The objective of the thesis was to (1) analyse the water flows in the soil-root domain (2) quantify the contribution of plant regulatory processes.

2010-2012 **President of the ACELI** Earth and Life Institute, UCL, Belgium
The ACELI is the Earth and Life Institute Researchers' Association. It represents more than 300 researchers from multiple fields such as agronomy, microbiology, environmental sciences or climatology.

Computational skills

Plant phenotyping Java, ImageJ, R
Implementation of several plant image analysis tools.
Integration of modelling tools within phenotyping pipelines

Plant modelling Java, R
Implementation of a functional-structural plant model, PlaNet-Maize.
Creation of a model of tomato inflorescence development.

Public database creation and management SQL, HTML5, PHP, Javascript
www.plant-image-analysis.org
www.flor-id.be

Web-based tools R, HTML
MECHA: mecharoot.github.io
CRootBox: bit.ly/crootbox-web
ArchiDART: https://archidart.github.io
Water Tool Network: bit.ly/water-network-app

Awards, distinctions and grants

2015 **Teaching Tools in Plant Biology Competition - Plant Cell** Winner
Root System Architecture quantification. Why and How?

2015 **Roundtable organisation competition** Winner
Rhizosphere 4 Meeting

2014 **FNRS Post-doctoral fellowship** ~ 160 000 € (3 years salary)
Fonds de la Recherche Scientifique - FNRS, Belgium

2012 **Honorary fellowship**
Belgian American Educational Fundation

2012 **Best oral communication** Second prize
17^{th} symposium on Applied Biological Sciences, Leuven, Belgium

2010 **Best poster** First prize
Plant Science Doctoral School, Liège, Belgium

2010 **FRIA fellowship** ~ 96 000 € (4 years salary)
Fonds de la Recherche Scientifique - FNRS, Belgium

Education

2008–2012 **PhD** in agronomical sciences — Ecophysiology and Plant Breeding, UCL

2012 **Teaching formation** for higher education — IPM, UCL

2003–2008 **Master** in bio-engineering — Université catholique de Louvain

2007 **Erasmus** Exchange program — University of Manchester, UK

Other informations

Teaching experience
Plant-soil interactions, Root modelling, Scientific figures, LaTeX and ImageJ course

Thesis supervision
Supervision of 3 PhD (ongoing) and 6 master theses

Boy-scout leader
Organisation of projects abroad (Ireland, Czech Republic, Morocco)

Personal interests
Sign languages and deaf culture, reading, technology, running, hiking, environment

- Journal names were intentionally left blank.
- Link to all articles can be found on www.guillaumelobet.be.
- Bibliometric data are coming from dimensions.ai and altmetric.com.
- The Field Citation Ratio (FCR) indicates the relative citation performance of an article, when compared to similarly-aged articles in its subject area (1 = average).
- The Altmetric Score is an automatically calculated, weighted count of all of the attention a research output has received online.

Articles in peer-reviewed journals

Going with the flow. Multiscale insights into the composite nature of water transport in roots
Couvreur, V., M. Faget, G. Lobet, M. Javaux, F. Chaumont, and X. Draye
2018 | Citation(s): | FCR: | Altmetric score: 58
URL: `http://dx.doi.org/10.1104/pp.18.01006`

archiDART v3.0, A new data analysis pipeline allowing the topological analysis of plant root systems
Delory, B., M. Li, C. Topp, and G. Lobet
2018 | Citation(s): 4 | FCR: | Altmetric score: 39
URL: `http://dx.doi.org/10.12688/f1000research.13541.1`

Impact of crop residue management on crop production and soil chemistry after seven years of crop rotation in temperate climate, loamy soils
Hiel, M., S. Barbieux, J. Pierreux, C. Olivier, G. Lobet, C. Roisin, S. Garré, G. Colinet, B. Bodson, and B. Dumont
2018 | Citation(s): 1 | FCR: | Altmetric score: 5
URL: `http://dx.doi.org/10.7717/peerj.4836`

Measuring root system traits of wheat in 2D images to parameterize 3D root architecture models
Landl, M., A. Schnepf, J. Vanderborght, G. Bengough, S. Bauke, G. Lobet, R. Bol, and H. Vereecken
2018 | Citation(s): | FCR: | Altmetric score:
. URL: `http://dx.doi.org/10.1007/s11104-018-3595-8`

Demystifying roots, A need for clarification and extended concepts in root phenotyping
Lobet, G., A. Paez-Garcia, H. Schneider, A. Junker, J. Atkinson, and S. Tracy
2018 | Citation(s): | FCR: | Altmetric score: 27
URL: `http://dx.doi.org/10.1016/j.plantsci.2018.09.015`

Connecting the dots between computational tools to analyse soil-root water relations
Passot, S., C. Couvreur, F. Meunier, X. Draye, M. Javaux, D. Leitner, L. Pagès, A. Schnepf, J. Vanderborght, and G. Lobet
2018 | Citation(s): | FCR: | Altmetric score: 42
URL: `http://dx.doi.org/10.1093/jxb/ery361`

A New Phenotyping Pipeline Reveals Three Types of Lateral Roots and a Random Branching Pattern in Two Cereals
Passot, S., B. Moreno-Ortega, D. Moukouanga, C. Balsera, S. GUYOMARC'H, M. Lucas, G. Lobet, L. Laplaze, B. Muller, and Y. Guédon
2018 | Citation(s): 1 | FCR: | Altmetric score: 23
URL: http://dx.doi.org/10.1104/pp.17.01648

CRootBox, A Structural-Functional Modelling Framework For Root Systems
Schnepf, A., D. Leitner, M. Landl, G. Lobet, T. Hieu Mai, S. Morandage, C. Sheng, M. Zoerner, J. Vanderborght, and H. Vereecken
2018 | Citation(s): 7 | FCR: | Altmetric score: 67
URL: http://dx.doi.org/10.1093/aob/mcx221

EZ-Root-VIS, A Software Pipeline for the Visual Reconstruction of Averaged Root System Architecture
Shahzad, Z., F. Kellermeier, E. Armstrong, S. Rogers, G. Lobet, Hills, and A. Amtmann
2018 | Citation(s): 1 | FCR: | Altmetric score: 22
URL: http://dx.doi.org/10.1104/pp.18.00217

Combining semi-automated image analysis techniques with machine learning algorithms to accelerate large scale genetic studies
Atkinson, J., G. Lobet, M. Noll, P. Meyer, M. Griffiths, and D. Wells
2017 | Citation(s): 7 | FCR: | Altmetric score: 46
URL: http://www.ncbi.nlm.nih.gov/pubmed/29020748

Image analysis in plant science. Publish then perish
Lobet, G.
2017 | Citation(s): 16 | FCR: | Altmetric score: 48
URL: http://www.ncbi.nlm.nih.gov/pubmed/28571940

This is a timely article, and one which correctly characterises key issues facing those creating and using image analysis tools in the biological sciences. The data presented is interesting and informative, and biologists using image analysis tools should be made aware of the issues raised in this paper.

[Anonymous Reviewer 2]

Using a structural root system model to evaluate and improve the accuracy of root image analysis pipelines
Lobet, G., I. Koevoets, P. Tocquin, L. Pagès, and C. Périlleux
2017 | Citation(s): 8 | FCR: | Altmetric score: 72
URL: http://www.ncbi.nlm.nih.gov/pubmed/28421089

An evaluation of inexpensive methods for root image acquisition when using rhizotrons
Mohamed, A., Y. Monnier, Z. Mao, G. Lobet, J.-L. Maeght, M. Ramel, and A. Stokes
2017 | Citation(s): 3 | FCR: | Altmetric score: -
URL: http://www.ncbi.nlm.nih.gov/pubmed/28286541

Teaching Tools in Plant Biology, Phenomics of root system architecture
York, L. and G. Lobet
2017 | Citation(s): 2 | FCR: | Altmetric score: 17
URL: http://www.ncbi.nlm.nih.gov/pubmed/29018159

Integrating roots into a whole plant network of flowering time genes in Arabidopsis thaliana
Bouché, F., M. D Alioa, P. Tocquin, G. Lobet, N. Detry, and C. Périlleux
2016 | Citation(s): 6 | FCR: 1.82 | Altmetric score: 9
URL: http://www.ncbi.nlm.nih.gov/pubmed/27352932

Environmental Control of Root System Biology
Rellan-Alvarez, R., G. Lobet, and J. Dinneny
2016 | Citation(s): 31 | FCR: 8.94 | Altmetric score: 8
URL: http://www.ncbi.nlm.nih.gov/pubmed/26905656

FLOR-ID, an interactive database of flowering-time gene networks in Arabidopsis thaliana

Bouché, F., G. Lobet, P. Tocquin, and C. Périlleux
2015 | Citation(s): 43 | FCR: 11.68 | Altmetric score: 32
URL: http://www.ncbi.nlm.nih.gov/pubmed/26476447

F1000 Recommended: FLOR-ID presents an impressive effort in bringing together literature on flowering-time regulation in Arabidopsis. Pathways are presented as interconnected schemes with the possibility of accessing individual gene information such as mutant phenotype or post-translational regulation. Every scheme presents data in a very explicit way, making this database ideal for new-comers to the field or for teaching.

[F. Parcy, CNRS]

archiDART, an R package for the automated 2D computation of plant root architectural traits

Delory, B., C. Baudson, Y. Brostaux, G. Lobet, P. du Jardin, L. Pagès, and P. Delaplace
2015 | Citation(s): 6 | FCR: 3.41 | Altmetric score: 24
URL: http://dx.doi.org/10.1007/s11104-015-2673-4

Root System Markup Language. Toward an unified root architecture description language

Lobet, G., M. Pound, J. Diener, C. Pradal, X. Draye, C. Godin, M. Javaux, D. Leitner, F. Meunier, P. Nacry, T. Pridmore, and A. Schnepf
2015 | Citation(s): 36 | FCR: 15.56 | Altmetric score: 34
URL: http://www.ncbi.nlm.nih.gov/pubmed/25614065

It is clear that the language will help empower plant biologists and computation scientist working in root phenotyping and modeling fields to leverage and share work more efficiently with others.

[Anonymous Reviewer 2]

Rhizoponics, a novel hydroponic rhizotron for root system analyses on mature Arabidopsis thaliana plants

Mathieu, L., G. Lobet, P. Tocquin, and C. Périlleux
2015 | Citation(s): 17 | FCR: 3.95 | Altmetric score: 3
URL: http://www.ncbi.nlm.nih.gov/pubmed/25657812

GLO-Roots, an imaging platform enabling multidimensional characterization of soil grown root systems

Rellán-Álvarez, R., G. Lobet, H. Hildner, P. Pradier, J. Sebastian, C. Yee, G. Yu, T. LaRue, C. Trontin, R. Nieu, J. Vogel, and J. Dinneny
2015 | Citation(s): 57 | FCR: 17.85 | Altmetric score: 120
URL: http://www.ncbi.nlm.nih.gov/pubmed/26287479

Comparative analysis of Cd and Zn impacts on root distribution and morphology of Lolium perenne and Trifolium repens. Implications for phytostabilization

Lambrechts, T., G. Lequeue, G. Lobet, B. Godin, C. Bielders, and S. Lutts
2014 | Citation(s): 6 | FCR: 1.12 | Altmetric score: -
URL: http://dx.doi.org/10.1007/s11104-013-1975-7

Plant Water Uptake in Drying Soils

Lobet, G., C. Couvreur, F. Meunier, M. Javaux, and X. Draye
2014 | Citation(s): 40 | FCR: 7.76 | Altmetric score: 3
URL: http://www.ncbi.nlm.nih.gov/pubmed/24515834

In summary, the update delivers a very useful overview of this complex, fast moving multidisciplinary area, that will be invaluable to non-specialists and specialists alike.

[Anonymous Reviewer 2]

A modeling approach to determine the importance of dynamic regulation of plant hydraulic conductivities on the water uptake dynamics in the soil-plant-atmosphere system

Lobet, G., P. Pagès, and X. Draye
2014 | Citation(s): 8 | FCR: 1.49 | Altmetric score:
URL: http://dx.doi.org/10.1016/j.ecolmodel.2013.11.025

Inflorescence development in tomato, gene functions within a zigzag model
Périlleux, C., G. Lobet, and P. Tocquin
